

Thick Film Power Resistors

Type MPT Series

Type MPT Series

The MPT Resistor series are a range of TO220 packaged, low inductance thick film power resistors which complement the thin film MPR series.

This small size, high power device packaged in 5 case sizes are ideally suited to applications where high power dissipation yet small size are key design requirements. The MPT Resistor series are the ideal solution for small snubber circuits, the output side of high speed pulse generators and low inductive resistor requirements in switch mode power supplies.

Case Temperature to be used for definition of Applied Power Limit

Case Temperature Measurement must be made with a thermocouple contacting centre of component mounted on designed heatsink

Thermal grease should be correctly applied
