

Click Packs

Get your creative kicks with a pack of clicks! Get your favorite packs at amazing prices, clear a table at your garage and start making the coolest gadgets. Possibilities are limitless, and bounded only by your imagination. Each bundle's name is a new project idea. Combine clicks with mikromedia or Easy boards, develop a firmware in your favorite compiler and bring your creation to life (OK, that sounded a bit like making Dr. Frenkenstein's monster). Every click boards comes with basic examples, but it's up to you to combine them into an awesome device which will make you a number one inventor in the neighbourhood (or Jedi Maker, if you like it better).

Traveller's click pack

Pack your bags, and hit the road. It's time for a roadtrip! Experience nature, people and cultures across the continents. You don't need to leave breadcrumb trails along the way, just make a cool gadget with this click pack and let it map your journey. Kit comprises **GPS3 click**, **microSD click**, **8x8 G click**, **BUZZ click**. Give a name to every expedition you go to, keep your "captain's log" full of juicy details, so you can one day tell the most amazing bedtime stories to your grandchildren. This bundle comes at a bargain price.

Tracking and security click pack

Safety first. Whether it's your house, car, or a cookie jar, you want to know if someone is messing with your belongings. Don't be too harsh if your kid is just borrowing the car for the night out without you knowing, but you're allowed to go into a frenzy if someone is stealing grandma's expensive handcrafted furniture. Whatever might be happening this mighty pack of click boards will help you develop a gadget which keeps you informed instantly. A carefully chosen collection of boards includes **GPS3 click**, **GSM2 click**, **Accel click**, **Relay click** and **GSM antenna included**. Price is specially crafted as well.

Pocket radio click pack

Even in wild forests, misty mountains or rocky seashores with no GSM coverage or internet you might get a signal from a local radio station and enjoy music or get your daily dosage of weather reports. You don't get to choose the songs, that's the down side of it, but you'll surely figure something out (switching the station when it starts to get on your nerves is one solution). Get your creative kicks and develop a gadget with **FM click**, **CapSense click**, **Flash click** and **8x8 G click**. The prices are as irresistible as your favorite TOP 10 chart!

I like it loud click pack

If you're the type of person that nods your head in a rhythm of a drum beat at the bus station with two wires hanging from your earlobes - than this is a click pack for you. Or maybe you like playing the air guitar or smashing the invisible drums at the favorite breakpoint of a rock song. Create a device with **MP3 click**, **Joystick click**, **microSD click** and **8x8 G click** and have it your way. Earbuds: check. microSD card: check. Battery: check. Now play that music loud!

Hiker's click pack

If you like climbing the mountains or walking for dozens of miles just to witness the sunset at the peak of a breathtaking landscape - than we'll help you get there safe. **Compass click**, **8x8 G click**, **Altitude click** and **SHT11 click** is a perfect collection sensors that will enable you to invent gadgets which will make you an unmistakable guide. Your own version of man versus wild can begin. Surely, a few friends along the way can make the experience more fun, with you as the true leader of the pack (note: girls love men with confidence).

Talk to things click pack

Don't mind your best friend staring at you in disbelief when you tell your lamp to turn off - and it listens. Superpowers from science-fiction movies will be at your disposal. We'll supply the magic ingredients: **SpeakUp click**, **Relay click**, **WiFi Plus click** and **Buzz click**, but it's up to you to combine them into the coolest gadget which listens and carries out your commands. Become the appliance wisperer (if that term even exists), but do hold the secret to yourself.

Storm chaser's click pack

The might and power of storms bring the humility and awe to all living beings on Earth. The rush of adrenalin when the lightning flashes and thunder breaks is equally there. Some of us like to chase that excitement in search for the severest storms, hurricanes and tornadoes, and the others just like to be warned on time to get the shelter filled with enough burritos and board games to last for a week. **Thunder click**, **Pressure click**, **SHT11 click** and **microSD click** is the pack that will provide your device the right kind of data so you can do either of those two.

App-Lighting click pack

Imagine how a key will look like to a young kid ten years from now: a strange carved piece of metal with no obvious features that indicate its purpose. Maybe it's a small saw for cutting something? No, it's too dull for that... Now with this click pack you can start living in the future. We've carefully selected **RFid click**, **Wifi PLUS click**, **Relay click**, **Buzz click** and **four RFID tags** to help you create an RFID doorlock for your home. Who knows, maybe a year from now your kids will look at traditional keys with the same confusion as in our hypothetical story.

Carbon monoxide is the gas you can't see, smell or taste, but must avoid. It's essential to know how much molecules of it surround you at any given time. It can be created by burning fossil fuels, or just by smoking cigarettes. If you want to sleep without worrying, then hop into your maker shed and make use of **CO click**, **GSM click**, **Relay click**, **microSD click** and **GSM right angle antenna**. Create an early warning and pollution preventing device that will potentially save lives.

We are swimming in a sea of invisible electromagnetic waves, all carrying gigabytes of data every millisecond. If you want to tap into this amazing world and surf like a pro, you need to master the most popular wireless communication standards. We'll help you become the wireless guru with **WiFi Plus click**, **Bluetooth click**, **BEE click** and **nRF C click**. Once you do, anything will seem possible. Clicks are carefully selected and given at bargain prices.

Scientists say that an average person spends about 4 years of his lifetime looking for misplaced remote controls - that's completely made up, but it does sound plausible doesn't it? According to our made up statistics, people also spend a few more years fighting with their partners or siblings over the right to hold the remote and choose channels. Now, with our Voice Remote click pack you can make a remote control out of your own voice. Stop wasting your years flipping couch pillows and monopolize your channel changing rights. Combine **SpeakUp click**, **IR click**, **Buzz click**, **Relay click** and enjoy yourself.

Turn up the lights in here, baby; extra bright, I want y'all to see this. It's a click pack for designing a DMX512 controller. That means stage lights, disco lights, or a really cool LED installation in your living room. The kit comprises a RD485 click 3.3V, WiFi3 click, ETH click and a BLE P click, so you can build a smartphone app and tinker with your lights whenever you want.

(PID: MIKROE-1783)

Master Chef click pack

A fast way to build a slow cooker. Based on the Flip & Click demo from Maker Faire Rome, Master Chef click lets you precisely control and time cooking processes. Rotary B click acts like a knob to control the heat, while Thermo click gives temperature feedback. RTC click is there to make sure you don't burn your stake. Finally, OLED W click would let you know when the food is done.

(PID: MIKROE-2079)

Breathalyzer click pack

Kiss of death or breath of fresh air? Test with the Breathalyzer click pack. Based on the Flip & click demo from Maker Faire Rome, the click pack comprises a combo of gas sensors – Alcohol click and Air Quality click, together with a pair of 8x8 clicks to display the results. See the results and decide whether to go out on a date or continue tinkering with your clicks in privacy (don't drive if the alcohol level is high).

(PID: MIKROE-2080)

Weatherman click pack

If you are too busy tinkering with your hardware to go outside, the Weatherman click pack is a perfect solution to keep you in touch with the outer world. You'll be able to hold confident chats about the weather and avert potentially uncomfortable social encounters. Based on the Flip & click demo from Maker Faire Rome, this click pack comprises a Thunder click, an OLED W click, a Weather click, and an Ambient light click.

(PID: MIKROE-2081)

YES, NO, MAYBE.

Magic Ball click pack

A hi-tech take on the classic decision making aid. A shake will decide your fate. Because important life decisions shouldn't be left to a coin toss. Better let billions of transistor give you a pseudorandom yes or no. Based on a particularly popular Flip & click demo from Maker Faire Rome, this click pack contains Accel click, OLED click, Button click, and Buzz click.
