Description

The SESD series Ultra Low Capacitance Diode Arrays provides signal integrity-preserving unidirectional ESD protection for the world's most challenging high speed serial interfaces. Compelling packaging options including the standard 2.5mmx1.0mm layout, the SOD883, and board space-friendly 0802 and 1103 DFN minimize trace layout complexity, save significant PCB space. Providing in excess of 20kV contact ESD protection (IEC61000-4-2) while maintaining extremely low leakage and dynamic resistance, offered in the industry's most progressive and soon to be popular footprints, the SESD series sets higher standards for signal integrity and usability.
