SCSI/Fibre Channel - External SCSI Adapter HD50M to Centronic 50F

Highlights

- Adapters convert older SCSI devices to work with newer SCSI installations
- Perfect for upgrading mixed installations

Description

Tripp Lite's external SCSI II adapter has HD50M to C50F connections. This adapter allows for the connection of mismatched SCSI peripherals. With these adapters you can save the time and expense of buying new cables by simply adapting your existing ones to interface with the connector types found on many of the newer model SCSI peripherals. Tripp Lite warrants this product to be free from defects in materials and workmanship for life.

System Requirements

- Any external SCSI device with HD50 interface needing to be attached to a Cen50 cable
- HD50 SCSI controller card attaching to a Cen50 cable

Package Includes

- External SCSI adapter HD50M to Centronic 50F

Features

- Allows adaptation of existing cabling for mixed SCSI applications
- All Tripp Lite SCSI products, regardless of the SCSI generation, meet the latest specifications of ANSI
- Tripp Lite offers a complete line of internal and external solutions for SCSI/RAID and fibre channel ranging from the very latest Ultra 320 to legacy SCSI-1 and every combination in between
- Tripp Lite warrants this product to be free from defects in materials and workmanship for life
