3M™ Fiber Dome Stubbed Terminal FDST-08-D-08-A-12-0200

3M ID 80611388705 UPC# 00051115624117 Part Number FDST-08-D-08-A-12-0200

The compact 3M™ Fiber Dome Stubbed Terminal FDST is designed to be deployed in outside plant FTTP networks. The re-enterable hermetically sealed fiber dome terminal can be deployed in aerial strand mount, pole mount, wall mount, pedestal or handhole applications.

The FDST terminal is equipped with flat dielectric cable and accommodates 4, 6 or 8 3M™ ECAM FD Factory Terminated SC/APC Fiber Drops. In the FDST 08 terminal, the drop cable is terminated inside the terminal. This helps to reduce the potential for connector contamination. The FDST terminal features a fixed O-ring sealing system along with an innovative latching mechanism. This combination provides simple, error-free terminal sealing and re-entry. Also, the re-entry feature allows easy access to clean and repair connectors and replace the terminal or terminal tail in the event that either of these are damaged. If you choose field terminated drop termination please refer to 3M's No Polish Single Mode Connectors. If you use the factory terminated drop termination then refer to the factory terminated drops.

Overview | **Documents**

Specifications

Applications	Wall Mount, Aerial Strand Mount, Pedestal, Underground, Strand Mount
Cable Length	200 Linear Foot
Cable Type	Flat Dielectric
Closure Height	6.0 Inch
Closure Length	13.0 Inch
Closure Width	7.2 Inch
Connector Capacity	12
Connector Type	LC/UPC
Drop Termination	Internal ECAM
Family	Fiber Dome
Fiber Count	12
Indoor/Outdoor	Outdoor
Length	13 Inch
Maximum Number of Drop Ports	8
Product Type	Terminal
RUS Listed	Yes/BA
Seal Type	Watertight
Splitter Capability	Yes

Stub Cable Type	Flat Dielectric
Trademark	3M
